Virginia Academy of Science to Meet

The Thirteenth Annual meeting of the Virginia Academy of Science, will be held this weekend at the University of Rich­mond. Hollins is particularly interested in the meeting, not only from a scientific point of view, but also because Miss Stiller will go into office as president of the Academy for the coming year.

Friday morning and afternoon there will be section meetings at which short lectures and demonstrations will be given. Dr. McGinnis is Chairman of the Psy­chology Division and will give a discussion on “Relative Difficulties of Words and Nonsense Syllables as Learning Material.” Miss Pillinger, Mrs. McGinnis, and Winnie Weav­er will also give a demonstration and discussion on “Oyaphe and Transmission Projection of Lecture Experiments.”

On Saturday morning there will be more section meetings and that afternoon, the visitors are invited to attend the May Day Festival given by the students of Watauga­ton College.

Many Couples Enjoy Sophomore Dances

Under a myriad of pastel colored streamers and vine-entwined lattices, the Sophomores gave the annual Spring Prom in theTalvolio, April 13. The gala occasion started with an informal tea dance which was held from 4:30—5:30 P.M. This dance was followed by a formal dance to be held at Hollins, was attended by a large crowd and crowned a great suc­cess.

The formal evening dance lasted from 9:00 P.M. until midnight, Jolly Lefler, and his North Carolina orchestra provided some very excellent music, especially of the slow-tempo type. The feature of the evening was the Sophomore figure. This was led by Elizabeth Williams, president of the Class, with Edward Andrews from

Fifth Annual Horse Show
Proves to Be Big Success

On Saturday, April 27, the Hollins College Riding Club held its fifth annual show on campus. Although comparatively few of the girls were there, the show was witnessed by a fair crowd of outsiders, whose enthusiasm was well repaid by the excellent performances of both horses and riders. Prices were well earned by the winners, who were chosen because of their best horsemanship. The winners were as follows:

CLASS 1

1. Eliese Toff.
2. Elizabeth Fair.
3. Louise Walker.

CLASS II

Pairs of Riders, Walk, Trot, Canter
1. Patricia Smith, Marion Bankson.
2. Susan Davis, Dr. Alex Wetmore.
3. Susie Coke, Martha Harmon.

CLASS IV

Class C Riders, Walk, Trot, Canter
1. Virginia Andes.
3. Margaret Winans.

CLASS V

Class B Riders, Walk, Trot, Canter
1. Patricia Smith.
2. Leila Reynolds.
3. Marion Bankson.

CLASS VI

Jumpers—Four Jumps
1. Marion Bankson.
2. Patricia Smith.
3. Leila Reynolds.

CLASS VII

Championship Riding Class, Walk, Trot, Canter, and Over Two Jumps
1. Leila Reynolds.
2. Virginia Redfield.
3. Margaret Winans.

Classes III, VII, and IX were ex­hibited.
In Class III (three gaited), Buddy McClanahan and Forrest Worth rode two horses from the Hobby Horse Farm. In Class VII, Elizabeth Henderson gave a splendid show of horsemanship jumping from Mr. McIntyre’s hunter, North Call. At the end, two five-gaited horses from the McIntyre farm were exhibited.

The whole show was a splendid success, and best of all, there was a good time for all.

The judges were Mr. A. W. Ward of Charlottesville, Mr. Turner was Ring Master, and Emily Trent Laffoon, As­sistant Ring Master. Miss Dorothy White and Miss Elizabeth Henderson were the instructors.

S. Worsham to Review Work of Jane Spencer

On May 9, at 7:30 P.M., S. Worsham will review a work before the American Journal of the research done by Jane Spencer, ’36, at the Postgraduate Medical School and Hospital, New York City, which was published recently in the Annuals of Surgery which is the official journal of the American College of Surgeons. All interested in this paper is invited to be present. The paper is "The Therapeutic Use of Concentrated Antibiotics in Serum of New York State Department of Health.”

Bates, Saunders, Nelson to Edit Publications

Other Organization and Class Officers Elected

Rosalie Bates has been selected as the editor-in-chief of the Student Life for the coming year. Rosalie has served on the paper for three years and is thoroughly familiar with every phase of its operation. Leila Reynolds serves as business manager of the Sophomore year, and as associate editor her Junior year. Phoebe McLaugherty will serve as business manager, Margaret McCormick, Mary Morris Watt and Bertrum Moore as associate editors, Katie Whitehead as news editor, Adelaide Smith as feature editor, Rosalie Bates as managing editor, and Blair Carter as assistant business manager. Most of the staff has not been announced but an entire new staff will take over their duties with the next issue. Carolyn Saunders and Leititia Nelson will write Editorials and Carpeus, respectively.

Dr. Ward Lectures on Famous Cathedrals

Dr. Clarence Ward, of Oberlin College, gave a lecture on Wednesday evening, April 10, on the famous cathedrals in France—Chartres, Armentia, and Reims. During the lecture he showed many beautiful slides of the exteriors and interiors of these cathedrals.

Dr. Ward explained that Chartres was started in the year 1140. Many peasants took part in the construction of this church which is also called the Cathedral of the Universe because of its vast number of sculptures and paintings. He showed a number of slides picturing the three famous doors of Chartres and remarked that it was impossible to give an adequate description of the exquisite coloring.

Dr. Ward then discussed Notre Dame at Armentia, the building of which was begun in 1220. The major factors which make this cathedral great are its vast beauty and size, the great ribbed vaults, and the tracery windows. The interior, said Dr. Ward, stands a supreme achievement as the most magnificent of the Gothic period.

The Cathedral of Reims was begun earlier and completed later than the other two. Dr. Ward pointed out that the interior is somewhat similar to that of Chartres, but the coloring is not as magnificent. It is often called the Cathedral of the Angels because of their vast number and varied types. Dr. Ward closed his lecture by quoting a poem by Longfellow.

Dr. Marcellus H. Stow Speaks on “Scenery”

Dr. Marcellus H. Stow, professor of geology at Washington and Lee, gave an interesting and educational lecture on March 20 on “The Appreciation of Scenery.” He was introduced by Dr. Patterson.

Emphasizing the fact that scenery is essential for beautiful scenery, Dr. Stow explained that geology is one of the most fascinating, yet one of the most unknown, of modern sciences. Geologists, he said, are able to take old stones, and by definite experiments on newer materials of the same sort, determine the approximate age and locality of the older stones.

He then explained how each layer of the earth’s surface represents some phase of the geological development of the world. During the course of the lecture, Dr. Stow gave many interesting descriptions of the formation of scenery in the United States, and particularly in this locality. In this discussion he included Tinker Mountain, Natural Bridge, and neighborhood springs. Mineral streams, he said, are caused by waters gathering soluble minerals from the earth, while hot springs are caused from water rising to the earth’s surface from deep mines. A true appreciation of scenery, he concluded, will add immensely to one’s appreciation of life and to the interest of travelling for anyone who is a keen observer.

Mr. and Mrs. Archibald Manning brought a good collection of art and decorating. This discussion also, was disappointing, as Mr. Manning said, “Real genius never gets lost.”
